

1 March 1963

MEMORANDUM FOR: Deputy Director of Central Intelligence
SUBJECT: Request for Computer Priority at
White Sands

1. The attached memorandum, Subject: "Establishing Priorities for Contractor Tasking at WSMR," details an urgent requirement we have for support from the White Sands Missile Range. In essence, OSI has a standing contract with White Sands to do certain weapon systems vulnerability analysis on the computers. We have asked them to undertake, on an urgent basis, a vulnerability analysis of OX to the SA-2 sites. The problem is one of priority on the computer, not manpower or money.

2. It is requested that you call General Thorlin, Commanding Officer, White Sands, and see if he would be amenable to having his computers available for the time indicated in the memorandum, which is a combination of two analog consoles for seven or eight weeks and some time on the IBM digital computer. If you do not feel like doing this, we shall approach them through another channel which I have not determined yet.

Respectfully,
E. B. GILLER

EDWARD B. GILLER
Acting Deputy Director
(Research)
